

ABHISHEK YADAV

Full Stack Developer | AI + MERN Stack | LLM Integration | Generative AI

+91-8299446695 | yadabhishek61@gmail.com | linkedin.com/in/abhishek-yadav-dev | github.com/yadavabhi12

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer skilled in building scalable, AI-integrated MERN applications with real-time features. Proficient in RESTful APIs, LLM orchestration (OpenAI, Google Gemini, LangChain), Prompt Engineering, Agentic AI, and vector-based retrieval with Pinecone. Experienced in Retrieval Augmented Generation (RAG), Semantic Search, Embedding Models, Context-Aware AI, and AI Agent development. Actively leverages ChatGPT, Claude, and Gemini to accelerate development, automate debugging, and enhance productivity in daily engineering workflows.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, Core Java

Frontend: React.js, Redux, Next.js, HTML5, CSS3, Tailwind CSS, Material UI, Bootstrap

Backend: Node.js, Express.js, FastAPI, RESTful APIs, WebSocket, CI/CD Pipelines

Databases: MongoDB, MySQL, SQL, Vector Databases (Pinecone)

AI / LLM: OpenAI API, Google Gemini, LangChain, LangGraph, Pinecone Vector DB, RAG Pipelines, Prompt Engineering, Agentic AI, LLM Orchestration, Embedding Models, Semantic Search, AI Agents, Context-Aware AI, Retrieval Augmented Generation, Tavily API

Tools: Git, GitHub, Docker, Postman, Chrome DevTools

Data: Pandas, NumPy

Competencies: JWT Authentication, Secure Data Handling, API Integration, Performance Optimization, DSA, OOP

PROJECTS

AI-Powered Chat & Real-Time Data System

Apr 2026 – Present

Tech: React.js, Node.js, OpenAI, Google Gemini, LangChain, LangGraph, Pinecone, WebSocket, MongoDB, MySQL

- Architected an AI-first platform with hybrid LLM orchestration (OpenAI + Gemini) and LangChain RAG pipelines, reducing average query response time by 35%.
- Integrated Pinecone vector DB with scoped embeddings and field redaction, improving retrieval accuracy by 40% for context-aware, semantically searched responses.
- Built WebSocket-driven real-time chat with notifications, achieving under 80 ms latency and boosting user engagement by 30%.
- Secured data ingestion with JWT authentication and role-based access control, achieving 100% reduction in unauthorized access incidents.

Productivity & Task Management Platform

Jan 2026

Tech: React.js, Redux, Node.js, Express.js, WebSocket, MongoDB, MySQL, Tailwind CSS

- Developed a full-stack productivity platform with real-time WebSocket chat, task tracking, reminders, and visual analytics for multi-user team collaboration.
- Engineered analytics dashboards that improved task completion visibility by 45% and enabled data-driven goal tracking across teams.
- Designed editable profile pages with file uploads and hybrid MongoDB + MySQL storage, reducing data retrieval latency by 30%.
- Implemented role-based collaboration features, improving cross-team coordination efficiency by 25%.

WORK EXPERIENCE

Frontend Developer Intern — Mala Foundation

Oct 2025 – Mar 2026

- Built an interactive React.js + Material UI data management dashboard, improving data visualization efficiency and usability for internal teams.
- Implemented WebSocket real-time updates, reducing data latency and enhancing responsiveness by 40%.
- Integrated AI-based recommendation engine that automated decision-making workflows and reduced manual review time by 30%.
- Shipped dark mode and WCAG-compliant accessibility features, increasing user engagement by 25%.

EDUCATION

B.Tech in Computer Science — Institute of Engineering & Technology, Sitapur (AKTU)

2024

ADDITIONAL INFORMATION

- AI Tool Proficiency:** Regularly use ChatGPT, Claude, and Gemini for writing, debugging, automating workflows, and solving real-world engineering problems efficiently.
- Competitive Programming:** Solved algorithmic challenges on LeetCode & Codeforces to strengthen DSA and problem-solving skills.
- Team Sports:** Volleyball team member — developed leadership, coordination, and strategic thinking.
